

## Parts Inventory

**The Next for Windows™** Parts Inventory System can help your company improve its profitability by controlling inventory levels and by processing customer orders more efficiently. It allows you to maintain a high degree of customer service while increasing inventory turns and controlling inventory investment. Information geared to your requirements is available on stocked and non-stocked parts, and includes description, usage, fill percentage, location, availability and more. This means you can accurately assess and manage stocking policy and reduce the number of emergency back-orders. In addition, where appropriate, the system will generate parts stock orders for all central and virtual warehouses, branches and vans.

### Features:

- ◆ Manage Inventory More Effectively by Knowing What's in Stock, On Order, Backordered, Reserved, Over-Stocked, and Under Stocked on Demand
- ◆ Improve Customer Service Levels; On-line Access to Important Information like Order Status, Inventory Levels and Account Balances, which makes it is easy for your Employees to Process Orders and Provide Answers to Customer Inquiries; Quickly and Accurately
- ◆ Analyze Order and Inventory Performance to identify your Best Customers, your Best Selling Products, Your Best Salespersons; and those that are not
- ◆ Physical Inventory allows for Traditional or No Suspension of Daily Activities
- ◆ Cycle Counts
- ◆ On Demand Management Reports including: Product History, Gross Margin, Inventory Shortage, Commission Analysis, and Price Exception. Immediate Access to Timely Order, Inventory and Sales Information can directly affect your Company's Cash Position
- ◆ Electronic Purchase Order Transmission
- ◆ 25 Months of Sales, Calls, Lost Sales and Backorder History
- ◆ Vendor Performance Tracking
- ◆ Automatic Identification of Customer or Work Order upon Receipt of Backorder and Freight can be distributed to the Documents Automatically
- ◆ Central and Virtual Warehousing
- ◆ Parts Cross Reference, Superseded and Replaced Parts
- ◆ Alternate Vendor Sourcing
- ◆ Microsoft SQL Database™
