

Rental

The Next for Windows™ Rental Management system provides more than just the necessary tools to effectively manage your rental fleet. The system prepares rental agreements, cyclical invoices, accumulates all maintenance

expenses for the life of the Machine, across ownership. Rental

utilization by days and dollars is available at the touch of a key and can be evaluated by group, product, model, or individual unit. It is a rare occurrence to find two companies that do business exactly alike. With this in mind, **EBS** has built in flexibility allowing you to tailor the system around your specific needs, without having to write new programs. As such, our Rental System is designed with the end user in mind; keeping it fast, simple, and easy to use.

Features:

- ◆ Utilization and Profitability Reporting
- ◆ Reservation Conflict Alert
- ◆ Buy-Out Calculations by Machine
- ◆ Tracks Equipment Financing and Notes Payable
- ◆ Inventory Tracking
- ◆ Rental History by Customer and Machine
